## ABOUT ME

I started my journey in IT two years ago at university, but it was hard to decide what I wanted and where to start in this endless ocean of knowledge. And after 2 years, I finally came to the discipline, clear goals and deadlines for myself, which has already brought its benefits in the form of knowledge in web development and QA.

As for now, I am still building my knowledge base in programming and actively looking for internship in Programming in order to build even deeper knowledge in this field.
